

general notes:

1. all windows are labeled in feet and inches.
2. refer to engineer's windstorm review for proper hold downs, nailing patterns and shearnail lengths as required.
3. verify with manufacturer/supplier for exact floor truss depth, microlam beam sizes & load bearing points.
4. verify with window manufacturer/supplier for minimum egress requirements
5. 2" x 6" exterior wall construction
6. any construction below flood zone shall be water resistive construction
7. no penetrations within common (2) hour fire resistant wall  
see sheet 5 for (2) hour common fire wall detail
